

2024 Operators Report

Well here we are in 2024, and I am very happy to say that 2023 was a reasonably uneventful year.

However, we did experience a main break in the Dunsmuir area, where the 6" main was cracked and had to be repaired immediately. Thank goodness I was able to procure contractors with the know how and the available machinery, Edgett contracting, who showed up and worked until 7PM to get the repairs done and we could once again turn the water back on to the ratepayers in this area.

I would like to take this opportunity to thank the residents of Qualicum Bay for being so diligent in winterizing their systems this past winter. We had quite a few cold spells, and thankfully very few call outs for freeze ups.

I would also like to than the residents for their cooperation in conserving water last summer. Once the restrictions were imposed, I noticed a considerable drop in water consumption. This drop in usage allowed us to eke through the drought without too many problems.

And I would also like to state that this year we are looking at even worse drought conditions, so I would ask the residents of Qualicum Bay to please pay attention to the restrictions, as you did last year, and hopefully we will come through it once again without too many issues.

Thanks again to everyone and have a great 2024..

Don Buchner
